	Fertigation	2 to 3		
Tree crops	Foliar	1 to 2	Apply early in the crop cycle as required.	500 to 1000
	Fertigation	4 to 6		

POISON - Keep out of reach of children.

FIRST AID - Avoid contact with eyes and skin. If poisoning occurs contact a doctor or poisons information centre on 131 126.

Any recommendations are a guide and must be adapted to suit local conditions. Adjust rates based on tissue tests, soil tests, local knowledge and the recommendation of your agronomist. Do not exceed a solution of 0.25 % on tree crops.

Wilchem's Sentinel Range has been formulated to protect micronutrients in solution to allow for the correction of nutrient deficiencies. It is compatible with a wide range of crop protection products. It is stable in alkaline soils and in the presence of soluble phosphates. A jar test should be performed and/or test application before preparing a full tank mix. Do not apply during periods of crop stress or extreme weather. Ensure all other products are mixed in the tank before adding. Do not apply during flowering and colour change. Do not apply as foliar to stone fruit.
